Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 9, 10, 12-14, 17 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Glover et al. Glover teaches a canopy (Fig. 1) being comprised of a frame (86) extendable over a play yard and a mesh canopy cover (82). The frame has at least three resilient pivotal support arms (91-96) and an arm attachment portion (86/88) and the cover has elastic members (116) at lower edges thereof, a top opening (under 84), a tubular enclosure (122) and a reclosable opening/cover (122 and sections 124,126).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Glover et al in view of O'Neill. As stated above, Glover teaches the limitations of claim 1,

including a canopy with a frame. For claim 11, Glover fails to teach a hanger on the cover. O'Neill teaches fabric with scallops thereon (Fig. 3); in the scallops are openings which allow the scallops to serve as hanger means for toys. It would have been obvious to one of ordinary skill in the art at the time of the invention to add scallops/openings on the inside surface of the cover of Glover, such as the scallops/openings taught by O'Neill, to provide a toy hanging means on the cover and as part of the play yard.

Allowable Subject Matter

Claims 4-8, 15, 16, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
